

How Far Apart Should I Plant My Trees?

Space Between *Trees* in a Windbreak:

Single Row Windbreaks

Shrubs	3-6 feet apart
Low Deciduous	5-8 feet apart
Conifers	6-10 feet apart
Tall Deciduous	8-12 feet apart
Tall Columnar Deciduous	6 feet apart

Multiple Row Windbreaks

Shrubs	3-6 feet apart
Junipers	
Windward	6-8 feet apart
Interior	6-12 feet apart
Low Deciduous	8-12 feet apart
Tall/Med. Deciduous	10-12 feet apart
Pines	10-12 feet apart
Spruces	
Windward	8-12 feet apart
Interior	12-16 feet apart

Space Between *Rows* in a Multiple Row Windbreak (in feet)

	Shrubs	Low Deciduous	Deciduous & Conifers
Shrubs	16	16	24
Low Deciduous	16	16	24
Deciduous & Conifers	24	24	24

Space Between Shrubs & Living Snow Fences (solid hedge)

For quicker, thick growth, plant shrubs 2-3 feet apart.

For taller growth, plant shrubs 3-4 feet apart.

Planting close will create a tight, solid wall of shrubs for excellent wind/snow protection.
