

Mini-Cassia Conservation Update

Volume
2024.3

East Cassia, Minidoka, & West Cassia Soil and Water Conservation Districts

Upcoming WORKSHOP

The Soil & Water Conservation Districts in Cassia & Minidoka Counties will be hosting a **SOIL MOISTURE & PESTICIDE Workshop** on Thursday, January 16, 2025. It will be an all day workshop and include continental breakfast, lunch, and pesticide credits.

The Workshop will cost \$10 to be paid at the door. Info and Registration online at www.MINICASSIASWCD.com or call one of our offices at 208-436-4202 or 208-572-3375.

Topics:

VOLES—Controlling the Maze Below the Surface.

Troubled WATERS in Southern Idaho.

Pesticide Application Do's & Don'ts.

Pesticide Uses that are Safe.

Moisture Monitoring Basics, Training, & Trouble Shooting.

And more....

COMMUNITY CONSERVATION CLASSES

The Soil & Water Conservation Districts are offering Community Conservation Classes **FREE** to the public.

Classes held in 2024 included topics on Pollinators, Bees, Honey Bees, Pollinator Seed Mixes, Summer Gardening Issues, Pest Trapping, Preparing Yards & Gardens for Winter, Preparing Places for Pollinators to Hibernate, and the How-To of Flower Bulbs. Presentations have been made by local experts.

The next Community Conservation Class will be held on Tuesday, February 25, 2025 at 7:00 PM. The topic will be **TREES for YARDS & WIND-BREAKS**. Register online at www.minicassiaswcd.com.

Other upcoming 2025 classes will include: Yard Design for All Seasons and Fire-Wise, Water-Wise, and Drought-Resistant Plants.

Trees for Yards & Windbreaks

FREE Community Conservation Class

Offered By:

The Soil & Water Conservation Districts

Tuesday, February 25, 2025

TOPICS:

- Windbreaks - What are they? Why plant one? Where to put it?
- Landscaping - Using Trees & Shrubs
- Tree Care - Dormant Pruning, Watering, and Spraying

Register online at

DISTRICT SUPERVISORS

Supervisors for the Soil and Water Conservation Districts are landowners in Cassia and Minidoka Counties who volunteer their time. They are interested in farming issues and want to make a positive difference in their communities. Serving as a Supervisor is a great opportunity to learn how to improve your own operation as well as help to make a positive difference within your own community.

If you are interested in serving on the Soil & Water Conservation District Board in your county, contact a current board member or call one of the NRCS offices for information.

Monthly Board Meetings

East Cassia SWCD - 1st Tuesday of each month
West Cassia SWCD - 2nd Tuesday of each month
Minidoka SWCD - 2nd Wednesday of each month

Any changes to meeting schedules will be posted in our offices and on our website at www.minicassiaswcd.com.

The "Conservation Update" is published 3 times a year by the East Cassia, Minidoka, and West Cassia, Soil and Water Conservation Districts and mailed to approximately 1,000 landowners, and sent by email to several hundred more. The distribution mailing list is maintained by the Information & Education Specialist in Burley, Idaho. Names may be added or removed from the mailing list for the next publication by calling 208-572-3375.

East Cassia, Minidoka, and West Cassia, Soil and Water Conservation Districts are non-profit organizations. All programs and services of the Soil and Water Conservation Districts are offered on a non-discriminatory basis without regard to race, color, national origin, sex, age, marital status, or handicap.

Soil Infiltration Rate

Measure of how quickly soil is able to absorb rainfall or irrigation, measured in inches per hour.

Application Rate

Measure of how quickly water is applied to soil, measured in inches per hour.

Water Holding Capacity

Ability of a soil to hold water, measured in inches of water per foot of soil.

Minidoka SWCD 5 Year Plan & Concerns

Minidoka is seeing a growth spurt in housing that is encroaching into agricultural areas which will impact soil, access, water, normal day-to-day farming practices, and land use. Many of our growers are dealing with annexed areas that no longer allow farm trucks on the roadways which cause issues with getting commodities to production.

Many builders do not understand the needs and practices of agriculture, which include planting, harvesting, the sound and the smell of animals and equipment, just to name a few things that pertain to farming. These issues are some that will need to be addressed and possibly mitigated in the near future.

Possible educational opportunities could include classes, forums, or workshops that provide opportunities for farmers to talk, teach, and work together with urban landowners and users.

Also listed in the 5 Year Plan is the concern for pollinators and providing programs that will benefit pollinators through education and training for the local community.

SOIL Health

Soil Health has always been a main focus for the Soil & Water Conservation Districts. Working to improve soil health is part of their 5-Year and Annual Plan Goals.

The Mini-Cassia Direct Seed & Cover Crop Project has been a great opportunity for the Districts to continue their work for improving soil health and conservation awareness.

The Soil & Water Conservation Districts have sponsored **8 Soil Health Workshops** and held **3 Cover Crop Field Tours**. The educational workshops started as part of a CIG grant the districts qualified for to provide cover crop seed information, seed mixes, direct seed drills, and education to the public. Districts continued to provide the soil health

EAST CASSIA HOSTS DIVISION IV FALL MEETING

Lt. Governor Scott Bedke addresses Supervisors from the Division IV area of Southern Idaho.

East Cassia Soil & Water Conservation District hosted the Fall Division IV meeting on October 30, 2024 at Wick's Steakhouse in Declo, Idaho. East Cassia Chairman Rob Cottle opened the meeting and introduced Lt. Governor Scott Bedke as the keynote speaker discussing water issues in Southern Idaho.

Eleven Soil Districts make up Division IV including East Cassia, Balanced Rock, Blaine, Camas, Gooding, Minidoka, North Side, Snake River, Twin Falls, West Cassia, and Wood River. District Supervisors attend Division IV meetings twice each year.

Chairman Cottle turned the remainder of the Division Meeting over to Division IV Director Richard Kuanu to address Division Business. Elections were held and Richard Kuanu from West Cassia SWCD was unanimously voted to retain his seat as Division Director. Nicolas Purdy from Blaine SCD was elected as Alternate Director, and Luke Stevenson from Minidoka SWCD was elected as the Division IV Secretary/Treasurer.

Each District gave a report on projects and programs they are currently implementing within their own areas. Reports were also given by the following cooperating agencies: IASCD (Idaho Association of Conservation Districts), ISWCC (Idaho Soil & Water Conservation Commission), NRCS (Natural Resource Conservation Service), and IDEA (Idaho District Employee Association). After dinner, Speech & Poster Contests were held with the theme: "May the Forest Be With You Always". Poster Winners included 2 5th grade students from Declo Elementary School and 1 from Dietrich Elementary School. The Speech Contest for High School students was held and winners were from Wood River, West Cassia, and Minidoka Districts.

Is *BLOWING SNOW* a problem for you?

Then it's time to start planning a WINDBREAK.

Windbreak helps can be found on our website www.minicassiaswcd.com under the "*SEEDLING TREE*" tab.

Living windbreaks can reduce the velocity and force of winds, lifting blinding snow and dust up and over the protected area. Windbreaks can provide protection to livestock, fields, homes, a road or lane, or down a property line. Windbreaks make great privacy hedges and wildlife habitat.

Plan your windbreak now. Order your seedling trees early.
(see order form in this newsletter)

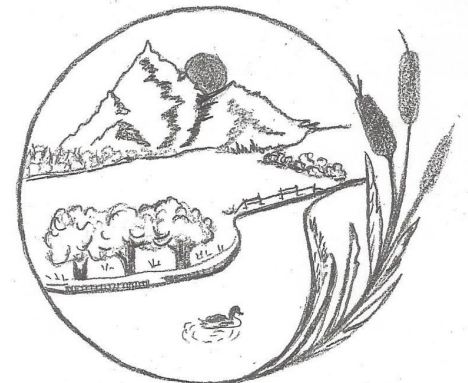

REBATES for MINIDOKA COVER-CROP PLANTINGS

Minidoka Soil & Water Conservation District is offering a rebate to farmers who are planting cover crops. Some of the requirements include:

- * Must be in Minidoka County,
- * Planting cover crops or planting ground cover,
- * Using best practices in the fall or early spring to assist in mitigating wind and water erosion on highly erodible fields,
- * Up to 120 acres can qualify at a possible rebate of \$6 per acre,
- * Seed mixes must be in accordance with Idaho Seed law.

Applications and detailed information are available in our office at 85 East Baseline (at the Minidoka County Fairgrounds) or call us at 208-436-4202.

2024 Conservation Theme:

May The FOREST Be With You Always

The Conservation Theme will be used this fall for the
SPEECH CONTEST (for high school students)
POSTER CONTEST (for 5th & 6th grade students)

Details on our website at

www.minicassiaswcd.com

Conservation Speech Contest

Six High School Students from Cassia & Minidoka Counties participated in the Annual Conservation Speech Contest on October 22, 2024. Students wrote their own 3-5 minute speech on the topic of “*May The Forest Be With You Always*”.

The first place winners, Navaeh from Minidoka District and Aralyn from West Cassia District, were invited to compete in the Division IV Contest held on October 30th where Navaeh placed 3rd and Aralyn placed 2nd over all of the Division IV contestants.

WE NEED YOUR HELP!

With limited press coverage in Cassia and Minidoka Counties, we need your help to share conservation news. The Soil & Water Conservation Districts offer a variety of educational programs for both adults and youth - and we need help spreading the word!

What YOU Can Do...

- ◆ You can help by sharing our Conservation Activities on Facebook by “following” and “friending” us.
- ◆ Please “like” and “share” our programs and posts with your friends, and encourage them to “follow” us.
- * You can help by forwarding this newsletter to your friends and contacts, and ask them to join our newsletter e-mail list.
- ◆ You can help by sharing our website:

**Improve the Value of Your Property
Plant a Windbreak**

STUDENTS EVALUATE the SOIL at the 2024 IDAHO STATE EVENT

FFA students from around the state of Idaho gathered together in Cassia County today (October 9, 2024) to compete in the 54th Annual **Idaho State FFA & 4-H Land & Soil Evaluation Career Development Event**. 19 FFA Teams attended the 2024 State competition.

Students have practiced hard and prepared to “evaluate” the soil. They have learned to recognize soil factors which identify specific soil characteristics. This training helps students make wise decisions in managing and using soil and land resources. Preparing and competing in this competition can help participants

understand basic soil properties and how these properties affect areas of crop growth and land development. You can watch a video with highlights from this year’s contest on our website at www.MINICASSIASWCD.com.

Soil & Water Conservation District Supervisors and employees, and NRCS employees, provided expertise, equipment, and labor in preparing the testing site and running the contest . Over 30 workers and volunteers assisted with the preparation and event activities, including Soil Scientist specialists, Soil District Supervisors, and Cassia County Commissioners. Thank you to the many individuals and businesses who support this educational contest through time and financial donations.

Thank you to all who helped with this competition including financial contributions from:

U of I Endowment Fund,
AgWest Farm Credit
D.L. Evans Bank,
Stukenholtz Laboratory
Timm Adams Farms,

The Mid-Snake Resource, Conservation, & Development,
The Natural Resource Conservation Service,
IDEA (Idaho District Employee Association), and
23 Soil & Water Conservation Districts throughout the state.

Butte Irrigation,
Redox Bio-Nutrients LLC,
Kloepfer Concrete,
United Electric Co-Op,

Top winners for the 54th Annual Land & Soil Evaluation Event 2024 include: Genesee FFA taking 1st place, Cambridge FFA placing 2nd, and Troy FFA placing 3rd.

The top 2 teams will receive scholarship money to assist with their travel to attend and compete at the National Land & Soil Evaluation Event to be held in Oklahoma City next spring.

The FORCE is Strong for Conservation!

5th & 6th Grade Students in Cassia & Minidoka Counties participated in the annual Conservation Poster Contest with the theme

“May The Forest Be With You Always”

Students are encouraged to create a poster to support conservation using the theme. Winners were selected from each elementary school that participated in the contest.

Declo Elementary Poster Winners - 1st place Blair (also won 1st place in East Cassia District and Division Contest 1st place), 2nd place Weston (also won East Cassia District 3rd place and Division 2nd place), 3rd place Caleb. Honorable Mentions: Emmersen, Riley, Vyla, Jace, Kolson, Emmrie, Carson.

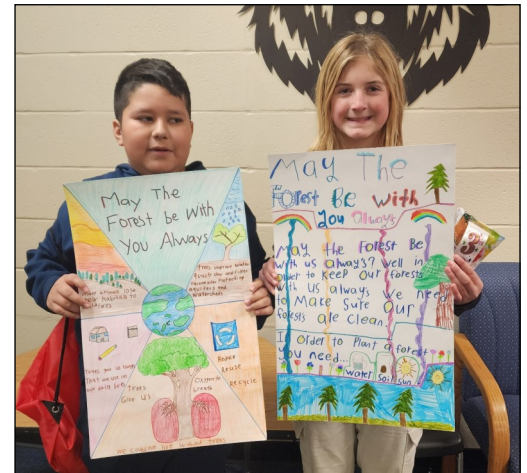

Acequia Elementary Poster Winners - (not pictured) 1st place Ailison (also won 3rd place in Minidoka District Contest), 2nd place Bryndalyn, and 3rd place Tvanna.

Dworshak Elementary Poster Winners - 1st place Traigen, 2nd place Kallie, 3rd place Kenya. Honorable Mentions: Becklyn, Zayda, Nyki, Hailee, Lili,

Rupert Elementary Poster Winners - 1st place Fernando and 3rd place Serenity.

Declo Junior High Poster Winners - 1st place Maria, 2nd place Annie (also won East Cassia District 2nd place), 3rd place Anistyn. Honorable Mentions: Kylie, Saige, Corban, Korbyn, and Presley.

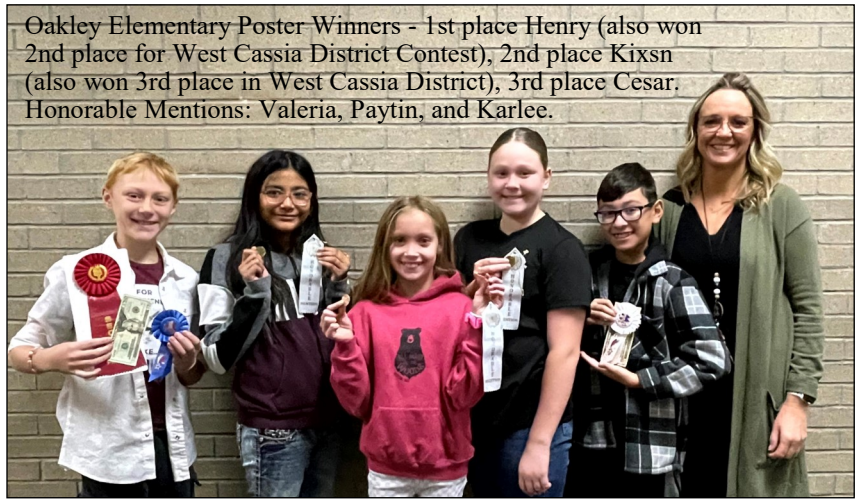

Heyburn Elementary Poster Winners - 1st place Royce (also won 2nd place in Minidoka District Contest), 2nd place Nora, and 3rd place Alex.

East Minico Poster Winners - 1st place Ekko, 2nd place Journey, and 3rd place Nicole.

Oakley Elementary Poster Winners - 1st place Henry (also won 2nd place for West Cassia District Contest), 2nd place Kixsn (also won 3rd place in West Cassia District), 3rd place Cesar. Honorable Mentions: Valeria, Paytin, and Karlee.

Paul Elementary Poster Winners - 1st place Eli, 2nd place Jocelynn, and 3rd place Alexandra.

JV Evans Elementary Poster Winners - 1st place Gracelyn, 2nd place Jaxon, 3rd place Scarlett. Honorable Mentions: Carson, Claire, Matthew, Addy, Kylie, Jatziry, Jaron, and Layla.

Raft River Elementary Poster Winners - 1st place Trent, 2nd place Zachariah, 3rd place Mia. Honorable Mentions: Ridge, Paetyn, Keygyn, and Jase.

White Pine Elementary Poster Winners - 1st place London (also won 1st place for West Cassia District), 2nd place Angela, 3rd place Jocelyn. Honorable Mentions: Maddie, Madalyn, Ella, Kadee, Amber, Katelyn, Haylee, Reese, Lola, Kimber, and Madelyn.

St Nicholas Elementary Poster Winners - 1st place Josrah, 2nd place Victoria, and 3rd place Jackson.

2025 SEEDLING TREE SALE

LOMBARDY POPLAR (*Populus nigra* 'Thevestina') 40 to 50', Zone 2. A perfect choice for a fast-growing privacy screen or wind break. Wonderful columnar habit with grayish-green foliage that provides a gorgeous backdrop for smaller trees and shrubs. Branches start close to the ground and grow upward, parallel to the trunk. Plant in rows about 6-8 ft. apart for screening. Hardy to -40°F.

NORWAY POPLAR (Cottonwood Siouland) (*Populus deltoides*) 40 to 60', Zone 3-9. This hybrid poplar is a fast-growing tree used for windbreaks and riparian plantings. Can be used down a property line or roadway. (Up to 6 feet per year with regular irrigation and protection from wildlife and animals.) Requires moist soil but can tolerate dry soil. 20-35' spread. Plant seedlings 8-12 feet apart for single row, 10-12 feet apart for multiple row windbreak.

RED MAPLE (*Acer Rubrum*) 50-60', to Zone 9. Noted for its lovely fall color, the Red Maple is a relatively fast-growing deciduous tree of pyramidal habit when young, becoming rounded to oval at maturity. The leaves emerge red, changing to dark green with whitish undersides and often develop dazzling yellows and red in the fall. Full sun or part shade. Grows in moist to wet, but well-drained soils. Native to North America. Excellent planting for lawns and streets.

AMERICAN ARBORVITAE (*Thuja Occidentalis*) 20'to 40' Zones 3-8. American arborvitae is a low-maintenance plant that tolerates clay soil, wet sites, and air pollution. It grows best in moist, neutral to alkaline, well-drained loam. It does not tolerate dry or exposed, windy sites. It grows well in full sun or partial shade. It is globular, pyramidal, or columnar to conical in growth form. Its density crown provides nesting sites for songbirds. A distinctive feature of this tree is its dominant trunk. The bark is grayish-brown to reddish-brown with shallow furrows. Small oblong cones appear in the spring, mature to a brown color in the summer, and may persist. Planted in groups or rows, it performs well as a hedge, privacy screen, or windbreak.

BALSAM FIR (*Abies Balsamea*) 40' to 60' Zones 3-6. Plant in sun to light shade with moist, well-drained soils. Protect trees from drying winds. Balsam fir is used primarily for Christmas trees and pulpwood. Balsam fir is native to the far northern parts of the United States and into Canada. Needles are 3/4 to 1 inch long, flat, and often strongly curved. It is generally found in areas with a cold moist climate and with 30 inches or more of annual precipitation. This evergreen tree has flat, dark green needles with a strong balsam scent. Balsam fir makes a striking figure in the landscape with its narrowly-pyramidal shape, but it does best in cooler northern climates.

COLORADO SPRUCE (*Picea Pungens*) 30 to 50', Zones 3-8. Gorgeous, brilliant, stately. The Colorado Blue Spruce is a slow growing pyramidal shaped evergreen with steel blue foliage. It prefers heavier soils, full sun, and clean cultivation. Will reach a height of six feet in eight years on a good site. Probably the most drought tolerant of all spruce. It is widely used in windbreaks or as an ornamental yard tree or Christmas Tree.

ROCKY MOUNTAIN JUNIPER (*Juniperus scopulorum*) 30 to 40', Zones 3-8. Rugged, pyramidal tree with silvery-blue green foliage. It is slow growing with foliage is dense and pleasantly aromatic. The fruits are fleshy berrylike spherical cones – they are bright blue with a whitish bloom and sweet tasting, with thin skins (good source of food for wildlife). Survives well in hot dry summers of western U.S.

CARAGANA - (Siberian Pea Shrub) 12—14 feet tall, Zones 2-8. A very hardy, medium to tall, upright shrub native to Siberia. Caragana has a moderate growth rate. It can withstand extreme cold and dryness. Adaptive to wide range of soils types and high pH. Yellow flowers bloom in May or June followed by seed bearing pods that ripen in July. Excellent for windbreaks and wildlife habitat.

GOLDEN CURRANT – 6 to 8', Zone 4. Thorn-less, loosely-branched, irregularly-shaped, deciduous shrub which grows to 6-8" tall and spreads suckers. Round, medium, bluish-green leaves that turn dull yellow in fall. Golden yellow flowers appear in the spring and emit a strong, clove-like fragrance. Fruit is edible - black berry which can be used in jellies, preserves and pies.

HANSEN HEDGE ROSE – Height: 3'- 5', All Zones. A living fence selection. Single pink to white fragrant blossoms appear in June and bloom all summer. The rose grows at a rate of up to two feet per year and will grow up to 6 feet tall. Disease resistant and winter hardy. Suitable for most any well drained soil. Space plants 24 inches apart in the row to create a fast-growing hedge.

COMMON PURPLE LILAC (*Syringa Vulgaris*) Height 12-15', Zones 2-8. Lovely clusters of lavender flowers grow from the branch tips in mid-spring. They make a wonderful contrast to the dark green leaves. Abundant clusters of sweetly fragrant, purple flowers in mid-spring on a vigorous, upright, multi-stemmed shrub with heart-shaped, green foliage. Ideal as a flowering hedge or screen. Plant near a window or pathway where the fragrant blooms can be enjoyed. Deciduous.

LILAC, WHITE (*Syringa Vulgaris*) Height: 8'-15' Zones 3-7. The very hardy *Syringa Vulgaris*, more commonly known as the common lilac, is a beloved deciduous shrub celebrated for its showy and sweetly fragrant spring flowers. Its pristine white flowers bloom on long, showy upright panicles in the mid-spring bloom time. The dark blue-green, heart-shaped leaves provide an elegant complement to the clustered blossoms. Lilacs grow best in full sun and well-drained soil. It can handle dry to moist soils. Lilacs grown in partial sun or shade will not flower well. The shrubs may take three to four years to establish themselves in a new site, but once established they can live for centuries. The bright white flower clusters are ideal for cuttings. Lilacs can be planted in a row as a hedge or single planting.
